Historical Geography is an annual journal that publishes scholarly articles, book reviews, conference reports, and commentaries. The journal encourages an interdisciplinary and international dialogue among scholars, professionals, and students interested in geographic perspectives on the past. Concerned with maintaining historical geography's ongoing intellectual contribution to social scientific and humanities-based disciplines, Historical Geography is especially committed to presenting the work of emerging scholars.

Articles appearing in this journal are abstracted and indexed in EBSCO and Elsevier electronic databases, including HISTORICAL ABSTRACTS and AMERICA HISTORY AND LIFE.
